Index of Subjects

ACTH, release in dairy cows, effects of morphine and naloxone, 467
Amino acids
cationic, heterogeneity of transport systems in mouse mammary gland, 21
see also, glycine
Angiotensin I-converting inhibitory peptides, from whey, 53
Autolysis
of *Lactococcus lactis* cheese starter, 585
in Swiss cheese, 261

Bacillus cereus, contamination of millk, 455

Capillary electrophoresis
analysing casein fraction of cheeses, 209
characterizing processed cheeses, 91
determining casein fractions in caprine milk, 113
Cardosin A, from from *Cynara humilis*, action on caseinates, 449
Casein
equilibria in milk, 361
fractions
in caprine milk by capillary electrophoresis, 113
in cheese, 209
peptides from, role in *Lactococcus lactis* growth, 233
β-Casein, alleles in cattle, 295
κ-Casein
action of psychrotrophic proteinases, 625
alleles in cattle, 295
gene, polymorphism, 107
macropeptide, ovine, chromatographic characterization, 349
rabbit, effect of expression on transgenic mouse milk, 541
Caseinate(s)
crosslinked films by gamma irradiation, microbial resistance, 119
ovine and caprine, action of cardosin A from *Cynara humilis*, 449
Caseinophosphopeptide, complex with iron, *in vitro* digestion, 125
Casein micelles, effects of high-pressure treatment on structure, 31
Cattle, crossbred and Zebu, κ-casein and β-casein alleles, 295
Cheese
casein fraction of bovine, ovine and caprine cheeses, 209
fat and water states, characterization by ^{1}H nuclear magnetic resonance, 609
flavour sulphides in, production by *Geotrichium candidum*, 371
Gorgonzola, odour-impact compounds, 273
processed, characterization by capillary electrophoresis, 91
soft ripened containing vegetable oils, lipolytic and oxidative stability, 461
Swiss, autolysis and proteolysis for two *Lactobacillis helveticus* strains, 261
Swiss-type, effect of somatic cell count and neutrophil content in ripening, 301
Citrate, metabolism by *Lactococcus lactis* mutants producing excess carbon dioxide, 571
Colostrum
mammary epithelial cells and analysis of immunoglobulin receptor,
pasteurization and immunoglobulin G absorption by calves, 619
Cortisol, release in dairy cows, effects of morphine and naloxone, 467

Dairy cows
effects of liner tension on teat condition, 319
effects of milking cluster on teat tissue, 309
effects of morphine and naloxone
on cortisol and ACTH release, 467
on milk ejection and oxytocin levels, 13
effects of sodium fertilizers and supplements on milk production, 1
polymorphism of κ-casein gene, 107
mammary infection with *Staphylococcus aureus* 155
substrate utilization in mammary gland, 171
Dairy ewes, measurement of mammary cistern size, 101

Exopolysaccharides, production by *Lactobacillus delbrueckii* subsp. *bulgaricus*, 131

Fatty acids, in lactobacilli, 241
Fish oil, effects on silage intake and milk production, 137

Gelation
enzyme induced, in whey protein isolates, 403
of β-lactoglobulin B, effect of partial hydrolysis, 597
Geotrichium candidum, production of flavour sulphides from methionine, 371
Glucono-δ-lactone, formation of milk gels combined with rennet, 415
Glycine, transport in mouse mammary gland, 467

Immunoglobulin
bovine G, absorption from colostrum after pasteurization, 619
porcine polymeric receptor, sequence analysis, 631
Interferon-γ, yeast expressed, effects on mammary gland and neutrophil action, 189
Interleukin-2, yeast expressed, effects on mammary gland and neutrophil action, 189
Iron, complex with caseinophosphopeptide, *in vitro* digestion, 125

Lactic acid bacteria
DNA fingerprinting by polymerase chain reaction, 381
effect on propionibacteria growth, 65

in starters, loss of activity during freezing and frozen storage, 83
Lactobacilli, fatty acid composition and freeze–thaw resistance, 241
Lactobacillus delbrueckii* subsp. *bulgaricus, production of polysaccharides, 131
Lactobacillus helveticus, autolysis and proteolysis in Swiss cheese for two strains, 261
Lactococcus lactis
cheese starter, effects of *N*-acetyl muramidase and cell proteinase on autolysis, 585
mutants producing excess carbon dioxide, 571, 641
proteinase-positive, growth in milk, 233
Lactogenic hormones, regulation of amino acid transport in mouse mammary gland, 21
β-Lactoglobulin
bovine
effect of partial hydrolysis on thermal gelation, 597
phenotype, association with whey protein and mRNA, 287
caprine
effect of polymorphism on milk-related traits, 443
gene, polymorphism, 217
purification from whey, 43
Lactose, metabolism by *Lactococcus lactis* mutants producing excess carbon dioxide, 571
Lamb rennet pastes, coagulating and lipolytic activity, 393

Mammary gland
health, effects of sodium fertilizers and supplements, 1
cationic amino acid transport systems, 21
cistern size, measurement in dairy ewes by ultrasound, 101
epithelial cells and analysis of immunoglobulin receptor, 631
glycine transport, 475
infection with *Staphylococcus aureus*, 155
relatedness of *Staphylococcus aureus* isolates, 429
substrate utilization, simulation analysis, 171
physiological activity, effects of yeast expressed interleukin-2 and interferon-γ, 189
Mastitis
Escherichia coli
role of endotoxin and TNF-α, 503
treatment with enrofloxacin, 485
financial impacts of control decisions, 515
Staphylococcus aureus
progress and detection, 155
relatedness of isolates, 429
Microbial resistance, of caseinate films, 119
Milk
bovine
composition, effect of fish oil supplementation, 137
contamination by *Bacillus cereus* in dairy plant, 455
heat and pressure treatments, effects on milk proteins and gel structure, 329
high-pressure treatment, effects on casein micelles and enzymic coagulation, 31
mineral and casein equilibria, effects of salts and chelating agents, 361
off-flavour, role of *Yersinia intermedia* and *Pseudomonas putida*, 561
phosphorylated compound content, 529
production, effect of fish oil supplementation, 137
production, effects of sodium fertilizers and supplements, 1
storage at 4 °C, effects on physicochemical and renneting properties, 199
camel
coagulation with camel calf and buffalo rennet, 73
caprine
distribution of nitrogen and casein fractions, 113
effect of β-lactoglobulin polymorphism on milk-related traits, 443
sterol content of fat, 437
storage at 4 °C, effects on physicochemical and renneting properties, 199
ovine
storage at 4 °C, effects on physicochemical and renneting properties, 199
transgenic mouse, effect of rabbit κ-casein expression, 541
Milk coagulation
effects of heat and pressure treatments, 329
effects of high-pressure treatment, 31
comparison of camel calf and buffalo rennet, 73
Milk ejection, in dairy cows, effects of morphine and naloxone, 13
Milk fat, sterol content, 437
Milk gels, rheological properties, 415
Milk production, mastitis control decisions, 515
Milking cluster, and changes in teat tissue, 309
Milks, infant, vitamin stability during storage, 225
Minerals, equilibria in milk, 361

***N*-acetyl muramidase,** role in autolysis of *Lactococcus lactis* starter, 585
Neutrophils
chemiluminescence
effect of treatment with enrofloxacin, 485
in periparturient period, relation with metabolites, 249
effect of interleukin-2 and interferon-γ on bactericidal activity, 189
effect of milk content on Swiss-type cheeses, 301
Nuclear magnetic resonance, for characterizing fat and water states in cheese, 609

Odour-impact compounds, in Gorgonzola cheese, 273
Oxytocin, effects of morphine and naloxone on levels, 13

Peptic hydrolysate, from goat whey, 551
Peptides
from casein, role in growth of *Lactococcus lactis* in milk, 233
from κ-casein, with psychrotrophic proteinase, 625
from whey, with angiotensin I-converting enzyme inhibitory properties, 53
Polymerase chain reaction
for analysing κ-casein and β-casein alleles in cattle, 295
for fingerprinting thermophilic lactic acid bacteria, 381

Polymorphism
of κ-casein gene in Holstein cows, 107
of caprine β-lactoglobulin gene, 217
Polymorphonuclear leucocytes, *see* neutrophils
Pregnancy-associated glycoprotein, relation with neutrophil activity, 249
Propionibacteria, lack of growth in milk from low inocula, 65
Proteinase
acid, stability, 637
cell envelope, role in autolysis of *Lactococcus lactis* starter, 585
immobilized, partial hydrolysis of β-lactoglobulin B, 597
psychrotrophic, action on κ-casein, 625
Pseudomonas putida, role in milk off-flavour, 561
Rennet, camel calf, characterization and comparison with buffalo rennet, 73
Renneting properties
of lamb rennet pastes, 393
of milks, effects of cold storage, 199
see also, milk gels

Silage intake, effects of fish oil supplementation, 137
Simulation analysis, substrate utilization in mammary gland, 171
Sodium fertilizers, effects on milk production, 1
Somatic cell count, effect of milk content on Swiss-type cheeses, 301
Staphylococcus aureus
mammary infection in cows, 155
relatedness of isolates from mastitic mammary gland, 429
Sterols, in caprine milk fat, 437
Storage of milk at 4 °C, effect on properties, 199

Teats
effect of teatcup liner tension on condition and teat canal keratin, 319
effect of milking cluster, 309
Transport
amino acids in mouse mammary gland, 21
casein-derived peptides, role in *Lactococcus lactis* growth, 233
glycine in mouse mammary gland, 475

Ultrafiltration
for caprine β-lactoglobulin preparation, 43
for caprine peptic hydrolysate characterization, 551

Vegetable oils, in soft ripened cheese, lipolyic and oxidative stability, 461
Vitamins, stability during storage of infant milks, 225

Whey
inhibition of propionibacteria growth, 65
peptic hydrolysates, 551
protein concentration and β-lactoglobulin phenotype, 287
source of β-lactoglobulin, 43
source of angiotensin I-converting enzyme inhibitory peptides, 53
Whey protein concentrates, fortification of skim milk for yogurt production, 329
Whey protein isolates, enzyme-induced gelation, 403

Yersinia intermedia, role in milk off-flavour, 561
Yogurt, preparation from heat- and pressure-treated milk, 329
